

**COSTA PRODUCT  
NUTRITION  
AND ALLERGY**  
*Guide*

**COSTA**

# INTRODUCTION

The information that we are required to provide to customers is changing. These changes are applicable across the whole food and drink industry all over Europe.

The biggest changes that you will notice is with the **Allergen** and **Nutrition** information we are now providing. This manual gives all the information that you require to keep our customer informed.

## **Allergen Information**

Allergic reactions can make people very ill and in extreme cases may lead to death. There is no cure for food/drink allergies. The only way someone can avoid getting ill is to make sure they don't consume the foods and drinks they are allergic to.

Ignorance is no excuse. The change in the law means that you will no longer be able to say that you don't know what allergens are in the food and drink you serve. Allergen information must be available

when requested. It must be available for food and drink.

For **Pre-Packaged** items e.g. Sandwiches, the required information is available on the back of pack.

For **Loose/Counter** items e.g. prepared drinks or pastries in the counter, the information is available in this manual.

### **BUT REMEMBER:**

It is particularly important to avoid cross contamination when preparing and serving a customer suffering with allergies to food and/or drink. Cross contamination is where something that could cause harm (such as an allergen, food poisoning bacteria etc.) is transferred from one surface to another. This could occur when a customer who is allergic to soya asks for a latte and the soya milk thermometer is inadvertently used to prepare their drink.

## **Nutrition Information**

Nutrition information is provided **per 100g/ml** and **per pack/portion**.

The data on the following nutrients is available for each product that we sell – either on the back of pack of pre-packaged items or within this manual for loose/counter items including prepared drinks.

Energy (given as kJ and kcal), Fat (in g), Saturated Fat (in g), Carbohydrates (in g), Sugar (in g), Protein (in g) and Salt (in g).

# CONTENTS KEY

Allergy data detailed in the table has been derived from technical specifications obtained from the suppliers of the products.

NB: please note that heating products in store will affect the allergy data as cross contamination on the Panini press cannot be prevented.

**'N'** means that the component is not part of the product as it is delivered by the supplier.

**'Yes'** in a column entitled 'allergen(s) (e.g. wheat gluten) present' indicates that the product contains that allergen & is therefore not suitable for a guest with an allergy or intolerance to it.

**'C'** means that this component is present in the manufacturing site/factory/supply-chain & our suppliers believe there is a significant risk that this allergen could cross-contaminate the food.

The **'Yes'/'No'** in the column entitled 'suitable for Vegetarians/Vegans' details information supplied by the product manufacturer. It does not take into account the in-house storage/preparation methods where cross-contamination issues could render the information void.

Gluten is a protein component of wheat, rye, barley & oats. When guests/Coeliacs ask about gluten consult the relevant columns.

Dairy includes all products containing milk or milk derivatives e.g. cheese, butter, yoghurt.

The Treenuts/nuts column indicates the presence of the following; almonds, Brazils, cashews, hazelnuts, macadamias, pecans, pistachios, walnuts & their respective derivatives.

The Additives column indicates whether any of the following are present: Artificial Antioxidants (A), Artificial Colours (C), Artificial Flavourings (F), Flavour Enhancers (FE), Artificial Preservatives (P) and Artificial Sweeteners (S).

NB: We have taken all reasonable steps to ensure that this table is accurate. Please note this data is accurate up until the point where the products enter the store. Once displayed/heated the allergen status of the products is likely to change. Your statutory rights are not affected.

## Drinks

Please note that all our drinks nutrition information has been calculated using published data and that dairy based

drinks may be subject to some natural seasonal variation.

Please also note that some of our drinks made with soya milk may contain other ingredients made from cows' milk. Please see the Allergy Data for full dietary information.

If you wish to add any extras to your drink please add these values to that of the drink.

## Example of how to use the tables

If a customer asks which allergens are present in white toast and marmalade, help them to find the correct data and advise them to read the Contents Key before making their choice. Remember it is guest choice.
